NOTES TO THE FINANCIAL STATEMENTS
AUGUST 31, 2003
(UNAUDITED - SEE NOTICE TO READER)**

NOTE 1 BASIS OF PRESENTATION

The interim period financial statements have been prepared in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the annual financial statements. These interim period statements should be read together with the audited financial statements and the accompanying notes included in the Company's last annual report.

NOTE 2 COMPARATIVE FIGURES

Certain figures presented for comparative purposes have been reclassified to conform with the current year presentation.

Gallery Resources Limited
Quarterly Report

August 31, 2003

Schedule B:

SUPPLEMENTARY INFORMATION

- 1.0 Analysis of expenses and deferred cost.
 - (a) Information is contained in Schedule A.
- 2.0 Related party transaction
 - (a) Wages, benefits and compensation for financing the company \$320,000.
- 3.0 Summary of securities issued and options granted during the period.

	Private Placements	Common shares	Consideration
(a)	3,345,000	.12	Cash
(b)	Warrants		
Exercised	4,950,000	.10	Cash
Issued	3,345,000	.15	
Expired	2,680,000		
(c)	Options		
Exercised	1,000,000	.10	Cash
Cancelled	Nil		
Issued	Nil		
- 4.0 Summary of securities as at end of reporting period.
 - (a) The authorized capital: The company has unlimited number of common voting shares and 113,690,403 shares are issued and outstanding;
 - (b) The number of options exercised is 1,000,000;
 - (c) The number of warrants exercised is 4,950,000;
 - (d) The number of warrants expired is 2,680,000;
 - (e) The number of warrants issued is 3,345,000;
 - (f) The number of options outstanding is 9,840,000;
 - (g) The number of warrants outstanding is 13,945,000.
- 5.0 Administrative expenses:

Wages and benefits	\$ 604,300
Office and miscellaneous	79,191
Advertising and promotion	53,264
Professional fees	34,803
Automotive and travel	13,772
Amortization	<u>1,076</u>
	\$786,406

Dale Pope-Director
Brian Cawley-Director

Schedule C: MANAGEMENT DISCUSSION AND ANALYSIS

Description of Business:

Gallery Resources Limited (the "Company") is an exploration company engaged in the acquisition and exploration of mineral properties in Labrador and Central Newfoundland. The Company is currently focusing its exploration activities on precious and base metals and holds an interest in a number of mineral properties in Labrador and Central and Western Newfoundland including its principal property known as the Katie Property located in Central Newfoundland. The Company is a reporting issuer in British Columbia and Alberta, and trades on the TSX Venture Exchange under the symbol GYR.

Katie Property

The Katie Property consists of 943 full size mining claims covering a total area of 47,150 acres (1,909 hectares) in central Newfoundland. The Company acquired an option to acquire a 100% interest in the property by making staged option payments in cash or shares of \$625,000 and issuing 200,000 shares. The vendors retain a 3% net smelter return, 2% of which the Company can purchase for \$3,000,000.

A report on the Katie Property dated November 5, 2001 was prepared in accordance with NI 43-101 by the Company's qualified person, Derek Wilton.

Exploration Program

A 3,000 metre diamond drill hole program and surface exploration program was planned during the past fiscal year to test the potential for the discovery of VMS mineralization. The work program was estimated at approximately \$500,000 and completed at a cost of \$545,988.

Exploration Results

The Company announced July 9, 2003 a new discovery of high-grade gold mineralization on its Katie Project in central Newfoundland. Six (6) samples from a 30 metre (100 ft) section of large (up to 2 metres) angular boulders, interpreted to be sub-outcrop (close to bedrock source), have encountered consistent gold mineralization grading from 0.033 g/t up to 16.7 g/t (0.51 oz/t).

The Mystery Pond Gold Zone is a zone of pyrite and arsenopyrite mineralized, intense silica alteration and quartz veining also exposed in outcrop at the south end of Mystery Pond. This extensive zone was first discovered in 2002, when sampling of outcrop returned gold assays up to 0.18 g/t gold. The large boulders containing the high-grade mineralization are similar to the mineralized alteration zone first seen in outcrop 800 metres (½ mile) south of the new high-grade discovery.

The high grade gold was discovered while carrying out a recent Mobile Metal Ion (MMI) soil sampling survey of the area, selected because of the 2002 discovery of gold mineralization in outcrop. The MMI survey has also encountered highly anomalous gold in soils, which is a further indication of high-grade gold mineralization in this area.

The Mystery Pond Gold Zone shows good potential for significant strike length up to at least 4 kms based on results from earlier work programs. These results include a pyrite-arsenopyrite mineralized outcrop located in a bog 1.6 kms north, discovered by Rio Algom in 1986, which was never investigated. This area is also highlighted as a large (1 x 0.7 km) coincident gold and arsenic (arsenopyrite is rich in arsenic) soil anomaly detected by BHP Minerals during a 1992 regional survey. In 2001, 1.4 kms south of Mystery Pond, Gallery prospectors encountered gold mineralization ranging up to 0.65 g/t gold in boulders similar to the Mystery Pond Zone and high arsenic ranging up to 0.22% in soils. Also, an airborne electromagnetic (AEM) survey completed in 1982 show a set of parallel AEM conductors corresponding to the Mystery Pond sulphide

mineralization with a strike length of 2 kms. (The pyrite and arsenopyrite mineralization containing the gold at the Mystery Pond Zone is of sufficient concentration to produce the AEM conductors).

The Mystery Pond gold mineralization and its potential strike length is also regarded as a significant discovery because it is situated along a major structure, which can be traced for 20 kms through the Katie Property. This structure, defined by a distinct magnetic trend outlined by a government regional magnetic survey, is the site for other well-established gold and base metal (zinc-copper-lead) prospects and showings on the property. To date, these prospects include the Black Bart, McDonald, Bruce Pond Epithermal and Tall Tree Gold and VMS zones all of which contain drill indicated, significant mineralization and silica alteration.

Future Developments

The Company will be focusing its exploration efforts at the Mystery Pond Zone. The cost of this exploration program including drilling and field work is estimated at \$437,000.

Shabogamo Project

On June 28, 2002 the Corporation signed a Property Option Agreement with BHP Billiton Diamonds Inc. ("BHP") to acquire a 50% interest in 2,181 mining claims covering 109,050 acres known as the Shabogamo Project in Western Labrador. Under the terms of the Option Agreement the Company is required to issued 200,000 shares to BHP and incur expenditures of \$1,000,000 over a period of 54 months. This project will be Joint Venture between the Company and BHP. Regulatory approval of this acquisition was required by the TSX Venture Exchange. This was obtained during the current fiscal year.

Exploration Program

During the past fiscal year the Company completed the Phase 1 work program which included an airborne electromagnetic survey at a cost of \$454,170.

Exploration Results

The airborne survey identified 20 bedrock conductors that occur within, or on the contact of, magmatic rocks of the Shabogamo intrusions.

Based on an interpretation of that data, BHP recommended immediate ground followup over all areas of the Geotem conductors. Its interpretation confirms that many of the conductors are in a favorable geological setting for hosting nickel-copper bearing, magmatic sulphide mineralization.

Future Developments

The Company will be proceeding with an exploration program consisting of drilling and field work on the Shobagamo project at an estimated cost of \$283,000.

General and Administrative

Administrative expenses for the six months ended August 31, 2003 were \$235,333 compared to \$512,425 for the six months ended August 31, 2002.

Liquidity and Solvency

At August 31, 2003 the Company had working capital of \$78,763. The Company will be relying on private placements and the exercise of stock options and warrants to fund the Company.

Subsequent Events

On October 10, 2003 the Company closed a private placement for \$800,000. The private placement consisted of 8,000,000 units at a price of \$0.10 per unit with each unit consisting of one common share and a warrant to purchase an additional common share at an exercise price of \$0.12 per share on or before October 10, 2004 and at an exercise price of \$0.15 per share on or before October 10, 2005. The proceeds from the private placement will be used for the current exploration programs and general working capital.
